AIR FORCE PRIORITY PROJECT TASKING  
PERSONNEL SECURITY SUB-COMMITTEE

1. Conduct an ongoing review of DCID 1/14 to ensure that its standards and requirements continue to meet the needs of the Intelligence Community.
2. Consider the feasibility of establishing reasonable standards for granting exception to DCID 1/14 concerning non-U.S. citizenship of family members of those persons applying for SCI access.
3. Pursue polygraph initiatives and the applicability of the polygraph to the Intelligence Community personnel security program. Included in this effort will be research and education as necessary to achieve broader use of the polygraph within the Intelligence Community.
4. Conduct a follow-on evaluation and data analysis of the 1980 Investigative Standards Working Group Personnel Security Survey.
5. Coordinate 4C programing to insure its compatibility with the adjudicative and clearance/access needs of the Intelligence Community.
6. Improve and update the SCI Adjudicators' Conference as an ongoing effort.
7. Examine the personal liability of investigators, adjudicators and other personnel security officers vis-a-vis the Federal Tort Claims Act. It is intended that this examination culminate in the presentation of a short (two or three days) seminar about the legal principles that impact on personnel security officers, to include personal liability, constitutional rights, investigative sufficiency, etc.
8. Address the problem of personnel security investigators, who normally are not law enforcement officers, obtaining local criminal history information.
9. Establish a training course for adjudicators trainees and interns that encompass both collateral clearance and SCI access eligibility considerations.
10. Propose a draft replacement of Executive Order 10450 encompassing all aspects of the federal personnel security program (employability, clearability, etc.), specifically to include the needs of the Intelligence Community.
